Attorney Docket No. 71-001

Specification Amendments

Applicant requests entry of the following amendments to paragraphs 33 and 39 of the specification:

[0033] First shield 4 is substantially planar (flat) in shape, oriented in a substantially vertical dimension. First shield 4 is dimensioned such that an inferior border 14 extends below the gingival margin (not shown) and a superior border 16 extends to the level of or above or below (Figure 6) the occlusal table 30. First shield length is determined by the number of teeth desired to be isolated.

[0039] Second shield 6 is substantially planar (flat) in shape, oriented in a substantially vertical dimension. Second shield 6 is dimensioned such that second shield inferior border 34 extends below the gingival margin (not shown) and second shield superior border 42 extends to the level of or above or below (Figure 6) occlusal table 30. Second shield anterior end 44 is rounded for patient comfort.
